## 1 Introduction

This report presents the process and results of two projects "Embedded Service for Self-adaptive Network" (ESS-NW) and "Embedded Service for Self-adaptive Car" (ESS-CAR). This chapter will start by describing the background of the two projects. The next thing to be described is formulation, goals and motivation of the two projects. Following this will be a short discussion on the delimitations for our team. The last part of this chapter will present an explicit report disposition which helps readers to get a sense of the overall report.
